

# FLASHSHIELD™ FLEXIBLE GAS PIPING

## THE PROOF IS IN THE PERFORMANCE.

When it comes to choosing the best flexible gas piping for your customers and your business, you want the one that outperforms the rest, and can prove it, too. That's where **FlashShield CSST** comes in. It's the only metallically shielded flexible gas piping system tested and proven\* to:

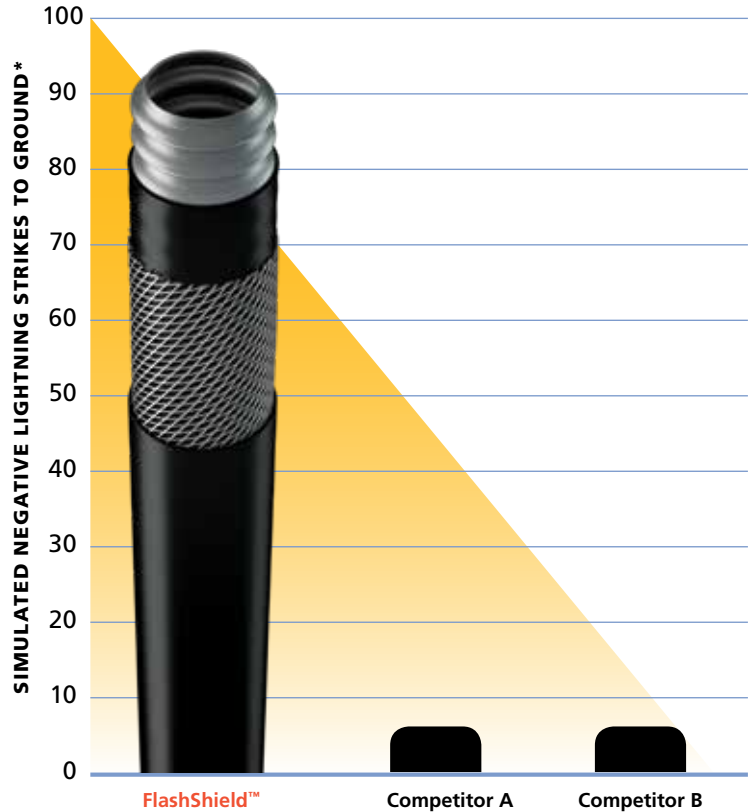

- Incorporate an **ELECTRICALLY INSULATIVE POLYMER COVER** to protect against electrical system failures & malfunctions
- Withstand nearly **95% OF SIMULATED DIRECT LIGHTNING STRIKES** (while the competition can only withstand around 5%)
- Utilize advanced **AEROSPACE SHIELD TECHNOLOGY**
- Meet strictest industry electrical arcing test, the **ICC-ES PMG LC1027**
- Provides **MORE THAN 10 TIMES** the lightning resistance of the competition for just a few dollars more per installation

\*Based on independent third-party testing.

**FLASHSHIELD™**  
**CSST WITHSTANDS**  
**NEARLY 95%**  
**OF SIMULATED**  
**DIRECT LIGHTNING**  
**STRIKES,** while  
 the competition  
 can withstand  
 only around 5%.

\*Negative lightning flashes measured at ground (SAE ARP5412)

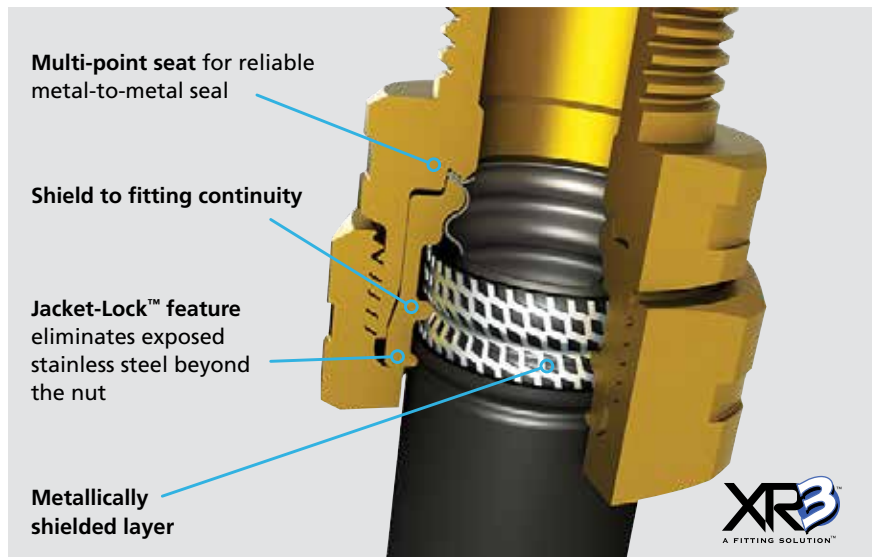

**MAKE EVERY INSTALLATION**  
**SAFER, SPEEDIER.**

Reduce installation time and user error with the Jacket Stripping Tool. Be sure to request your tool with your next order.

## A fitting evolution in CSST safety.

### THE XR3 FITTING.

Gastite has always led the way in offering the best installation choices for residential gas delivery systems. And now, thanks to our patented **XR3** fitting, the FlashShield product is truly the undisputed champion of CSST.
